

Manufacturer Highlights 2022

Manufacturer	Booth	News
 REC	A2.380	Don't miss it: On March 11 th at 4 pm REC will present the new generation of the Alpha solar module series. The details are still top secret, so be there! As well as for the REC Happy Hour afterwards.
 LUXOR <i>the sunshine people</i>	A1.190	This year, Luxor Solar will show the complete range of Premium Solar Modules from the glass-glass Eco Line models to the special models of the Special Line.
 TrinaSolar	A1.370	In 2022, Trina Solar will continue to offer innovative module technologies and groundbreaking solutions for residential and commercial projects, most notably the new Vertex S+ double-glass module with N-type cell technology.
 JinkoSolar <i>Building Your Trust in Solar</i>	A2.180 A2.181	The JinkoSolar booth shows how high-performance modules and a "green" value chain can be combined. Including the Tiger Neo solar module with up to 425 Wp in two optical versions and N-type cell technology.
 LONGi	A2.270	Celebrating the company's 22nd anniversary, LONGi will once again present the latest solutions and products from its innovation laboratories, including the new Hi-MO5m solar module with up to 420 Wp.
 Fronius	B4.310 B4.410	This year, our long-standing partner for inverters, system monitoring and storage solutions is one of the finalists for the "Smarter E Award" in the "Smart Renewable Energy" category with the Wattpilot.
 SMA	B3.210	At this year's fair, SMA promises innovative digital solutions for sustainable energy management. The EV Charger Business is aimed at e-mobility in an enterprise environment. The new three-phase inverter Sunny Tripower X is the first to feature integrated monitoring functions and is a finalist for the Intersolar Award.
 KOSTAL	B3.130	KOSTAL's theme for their appearance is "Quality and Innovation. Smartly combined". Accordingly, the focus lies on the interlocking of the company's own solutions for a well-thought-out overall system of intelligent energy generation.
 DELTA	B3.230	This year, Delta Electronics is presenting the new M250HV and M100A Flex inverters for the commercial and utility sector under the motto "Greener, Smarter, Together".
 solarEdge	B4.110	At SolarEdge, everything revolves around the complete home system. With the three-phase Home Hub inverters, Home Batteries and the Backup Box for backup power supply, visitors experience a holistic ecosystem - including EV Charger.

Manufacturer Highlights 2022

Manufacturer	Booth	News
 HUAWEI	B3.410 B3.310 B3.280	Unser neuester Partner Huawei stellt ein breites Portfolio an Batteriespeichern und smarten Wechselrichtern vor, darunter ein Finalist für den Intersolar Award „Photovoltaics“, der Smart String Wechselrichter SUN2000-215KTL.
 Tigo®	B4.357	Our newest partner Huawei will present a broad portfolio of battery storage and smart inverters, including a finalist for the Intersolar Award "Photovoltaics", the SUN2000-215KTL smart string inverter.
 Solar-Log™	B5.520	This year, Tigo Energy is focusing on the TS4 series products, which are now also available on the European market. These devices make solar systems even safer, more efficient and more transparent, e.g. through quick shutdown functions for emergencies.
 K2 systems	A6.380 A6.190	At the Solar-Log GmbH booth, visitors can experience the latest intelligent solutions from the areas of PV monitoring, smart energy and feed-in management.
 ALUMERO	A6.460	The manufacturer of mounting systems presents numerous incremental improvements for pitched and flat roof systems and shows new digital solutions for project planning. Also note: There will be numerous presentations at their own "Speaker Corner", as well as a small get-together on May 11 th and 12 th at 5 pm.
 LG Energy Solution	B1.410	Alumero's booth shows off the company's new digitalisation and sustainability concepts.
 fenecon	B1.230	With the RESU12 and the Prime models RESU 10H and 16H, a new generation for low-voltage and high-voltage storage units can be seen at this year's booth of the Korean manufacturer. Including the modular RESU as a special highlight.
 BYD	B1.420 B1.520	In addition to modular home and commercial storage systems, visitors to the FENECON booth can also experience the numerous functions of the open-source FEMS apps, for example consumption monitoring or self-consumption optimisation.
 RCT power	B1.220	Our partner for battery storage will present its extensive range of high- and low-voltage variants. BYD will also present a new solution for the commercial sector with the Battery-Max lite.
