ALUMERO Systematic Solutions

Product advantages

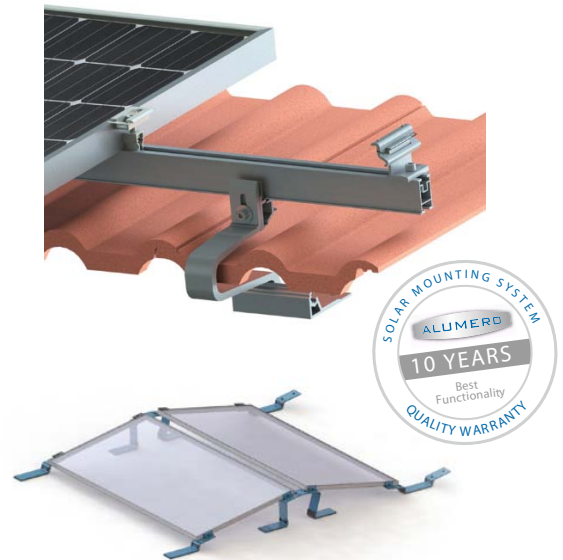

ALUMERO is a specialist in the field of mounting systems for photovoltaic and solar thermal installations with more than 25 years of experience. The company offers innovative solutions for ground mounted, pitched roof and flat roof systems. A staff of several hundred people at four different locations work on efficient product planning and consistent high-quality products.

Headquartered in Seeham (Austria), the reliable traditional company has production sites in the Netherlands, Poland and Slovenia as well a technology competence centre in Poland. Engineers working alongside experts in statics and analysis conduct research and development on improving systems and on new components. As a result, ALUMERO can offer a broad range of components and low logistics costs, thanks to the optimized packaging of pre-assembled components.

ALUMERO guarantees sustainable solutions, functional design and effective machine use – all from one hand and Made in Europe.

ALIVE WITH ALUMINIUM

Ease of installation

- Pre-assembled components for a fast installation
- Installation of ground screws replace the costly and time-consuming pouring of concrete blocks for ground mounted projects
- Specific roof hook design in case of overload: each mounting rail is compatible
- Easily adjustable components to fit various surfaces

Quality management

- Quality management according to EN ISO 9001:2015
- Manufacturing of load-bearing constructions according to EN 1090
- Welding quality requirements according to EN-ISO 3834-2
- Production of pitched roof solar mounting system AS 2.1 according to MCS (Multiple Chemical Sensitivity)
- 10 years product warranty

Product variety & innovation

- Aerocompact S and + for optimal mounting of framed modules on flat roofs
- Aerocompact G and G+ for fast installation of ground mounted systems
- Own technology competence centre ensures product optimisation and development
- Flexible solutions, thanks to the clever mix of high-quality stainless steel and innovative aluminium components

Service & customer satisfaction

- Only one contact person from design to assembly
- ALUMERO Solar.Pro.Tool allows for easy, effective and professional project design
- Comprehensive training material
- Best price-performance ratio
