# Solar-Log

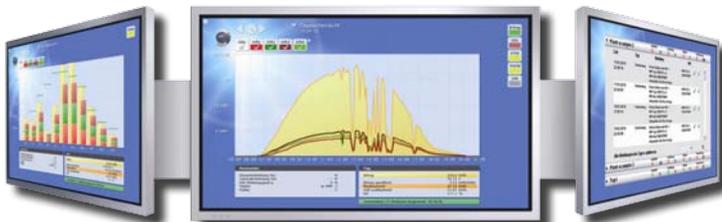

## Product advantages

**Solar-Log** is the quality brand of Solare Datensysteme GmbH, one of the leading companies for smart energy, feed-in management and PV monitoring, based in Geislingen-Binsdorf (Germany).

As a figurehead for intelligent and inverter-independent energy management „Made in Germany“, Solar-Log products ranging from private home installations to commercial large-scale systems can be optimally adapted to the respective system size and provide clear results and professional evaluations. Short development cycles, a high level of customer benefit and an extraordinary price-performance ratio characterize the Solar-Log product range. In addition, the company Solare Datensysteme supports operators and installers with worldwide service.

 **Made in Germany**

### Quality

- Quality certificate DIN EN ISO 9001 and environment certification DIN EN ISO 14001
- Extensive distribution and service network
- Made in Germany

### Flexibility

- Compatible with many inverter types
- Monitoring of 1-100 inverters
- Monitoring and evaluation platform in one
- Optimized domestic electricity consumption: activation of max. 4 electrical devices

### Functionality

- The product range is capable of monitoring every system size
- Controllable power management for the reduction of performance
- Calculation and display of electricity balance

### Usability

- Universal application with fast and easy software installation
- Graphic data evaluation
- Online monitoring
- Automatic inverter recognition
